# Hawkins

Leaders in forensic investigation

## Digital Forensics

*Our Digital Forensic experts have the technical knowledge and experience to tell you how a device or data was involved in an incident and what relevant information it contains.*

# Digital Forensics

With the advent of smartphones, cloud computing, and interconnected systems, the digital landscape has become a dynamic arena where illicit activities often leave a trail of electronic evidence.

Digital Forensics is a highly specialised and rapidly growing field of investigation. It involves the systematic investigation and analysis of digital devices, networks, and data to identify, preserve, and interpret the electronic evidence.

Given the prevalence of technology in the world today, and as the volume and complexity of cybercrimes continue to rise, the need to investigate the activities conducted using digital devices is becoming more prevalent.

Our qualified experts complete all stages of Digital Forensic investigation (DFI) models while conforming to ACPO guidelines and ISO standards.

## How Hawkins Can Help

We acquire, analyse, identify, and report on electronically stored information (ESI) from servers, desktop computers, laptops, tablets, mobile phones, CCTV/DVR units, sat navs, USB storage devices and motor vehicles.

We provide answers and help you to understand questions such as:

- What user account used the device?
- What was the geographical location of the device?
- What events occurred during a specific timeframe?
- Was any data deleted or transferred?

Hawkins can conduct investigations on-site, or remotely in our own laboratories. We also provide consultancy advice to prevent similar events from happening again in the future.

## What we do

Hawkins is a multi-disciplinary forensic practice established in 1980. With a recognised and growing global presence, we have over 150 experts providing worldwide coverage from offices in Europe, MEA, and Asia, as well as key locations across the UK & Ireland. Our team of experienced investigators is able to provide advice and assistance at any stage of an incident, along with ongoing support and guidance for the future.

### PRE-FAILURE RISK MANAGEMENT

Guidance on design, installation, and regulations to ensure safety, compliance, and risk reduction.

### ROOT CAUSE ANALYSIS

Scientific investigation into all aspects of an incident to determine what happened, why and in what sequence.

### EXPERT WITNESS SERVICES

Independent and impartial technical advice, including quantum & delay services to assist Counsel during all aspects of litigation.

### POST-FAILURE ADVICE

Consultancy advice to reduce, mitigate and prevent risks associated with similar events happening in the future.

### MAJOR & COMPLEX LOSS

Global resources and multidisciplinary teams, armed with the knowledge, equipment and facilities to manage and investigate major and complex incidents.
